SLP: Samonas Listening Plan

Student: Professional implementation of Samonas starts with matriculation in S.I.L.C. (see other side for details).

Certification: Requires the practical experience, Samonas System knowledge and theoretical knowledge stated above.

teamPower, mySuccess, kidTalent: Samonas creates the SLP based on input parameters provided by the practitioner - the practitioner implements the SLP - Samonas adjusts the SLP to the client's needs.

universalModules: The practitioner creates the SLP based on sample cases - the practitioner implements the SLP - the practitioner adjusts the SLP to the client's needs.

Advanced SLP's: The practitioner creates the SLP from scratch, without presets - the practitioner implements the SLP - the practitioner adjusts the SLP to the client's needs.

Daily listening time and optimal level of Spectral activation is automatically calculated based on user rating of the listening experience.

+ Package Option, + Manual Listening Profile and + Manual Spectral Activation are additional options for an experienced user.

2-day CORE Training OBJECTIVES

This training course provides the theoretical and practical knowledge as well as the Samonas system knowledge for advanced implementation of Samonas S.M.A.R.T.-listening in a professional environment.

As knowledge resource this training

- helps to understand the basics of neuro-anatomy of the auditory system and the science behind music, sounds, attention and discrimination
- provides criteria when to recommend auditory training
- teaches in which areas auditory training is helpful
- explains what changes can be expected and why (neurological reasoning).

As qualification course this training focuses on the Samonas universalModules and Samonas advancedListening (the practitioner is in charge to create the listening plan for the client

For the teamPower concept allowing an easy start with minimal need of Samonas System knowledge and practical experience please refer to the Samonas 1-day ENTRY training.

This training has been developed to allow an immediate implementation of Samonas Auditory Training with your client.

Based on practical examples the participant will be trained in

- preparing all relevant input parameters for an assessment based, goal oriented, personalized Samonas Listening Protocol
- choosing the correct module or advanced listening plan for a given client
- guiding a client through his/her listening plan
- monitoring listening results
- tailoring (adjusting) the clients listening protocol

This training follows the 6 STEPS TO SUCCESS provided by S.I.L.C.

SAMONAS 2 - DAY CORE - TRAINING FOR PROFESSIONALS

Knowledge Resource

AND Samonas Qualification Training

Complimented by S.I.L.C.

Samonas Integrated Learning Course

THE tool for the advanced professional

Auditory system and auditory processing

- peripheral and central auditory processing
- what is auditory training and why is it beneficial?
- issues and challenges related to auditory dysfunctions
- Bilateral development (part 1) and child development

The science of music and sounds

- Effective elements of music
- Goal oriented use of music and sounds of nature
- Categories of Samonas music selections
- Structure of sounds - Formants, trigger of listening
- The science of Spectral Activation
- Listening and discrimination

The knowledge above is recommended for any professional in order to understand the significant impact of auditory dysfunctions. Successful understanding of this knowledge is required as part of the Samonas 1 qualification

Who should attend?

Therapists and practitioners who wish to

- gain further understanding of the auditory system
- learn about auditory challenges
- understand the effects of music on the human system
- learn about therapeutic implementation of music
- reasons for and benefits of auditory training
- need to develop criteria when to refer to auditory training

Samonas qualification:

- Samonas 2 training level:
- universal Modules after completion of training
- package Option + manual Listening Profiles - add practical exp. req.
- Samonas 3 training level:
- Advanced Listening Plans - additional practical experience required

Samonas system knowledge and theory

- covers the modules Sy2+3 and Th2+3 (see table on other side)
- focuses on the Samonas universal Modules and advanced Listening where the practitioner is in charge of creating a personalized protocol
- provides the practical knowledge for the practitioner to create, monitor and adjust an SLP from his professional user account in ICP
- discusses input parameters required for a tailored protocol
- Introduces the use of the modules with sample cases and the advanced Listening Plans in relation to the practitioner's caseload
- provides criteria for monitoring listening results and adjusting and fine-tuning the program while moving through it

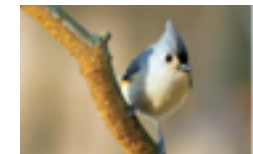

Who should attend?

Qualification Course for professionals who

- need to determine when to use Samonas Auditory Training
- want to start using Samonas immediately after the training
- are looking for the Samonas 2 & 3 qualification
- wish to prepare for Samonas 4 qualification
- want to upgrade from older versions of Samonas (i.e. SMART 2007)

6 STEPS TO SUCCESS

ASSESS
PREPARE
CHOOSE SLP
INDIVIDUALIZE
MANAGE
DOCUMENT

- This training follows the 6 STEPS TO SUCCESS the core structure of S.I.L.C.
- The Samonas ENTRY training comes with a matriculation as S.I.L.C. student
- This makes study resources available at any time during and after the training

Pre-requisites

When used as qualification course only

- On-site: Samonas 1-day ENTRY training 2008 or
- On-line: Facilitated SILC-team or SILC-universal
- Professional background and expertise in the area of use
- Professional profile and presentation in Samonas Network
