SLP: Samonas Listening Plan

Student: Professional implementation of Samonas starts with matriculation in S.I.L.C. (see other side for details).

Certification: Requires the practical experience, Samonas System knowledge and theoretical knowledge stated above.

teamPower, mySuccess, kidTalent: Samonas creates the SLP based on input parameters provided by the practitioner - the practitioner implements the SLP - Samonas adjusts the SLP to the client's needs.

universalModules: The practitioner creates the SLP based on sample cases - the practitioner implements the SLP - the practitioner adjusts the SLP to the client's needs.

Advanced SLP's: The practitioner creates the SLP from scratch, without presets - the practitioner implements the SLP - the practitioner adjusts the SLP to the client's needs.

Daily listening time and optimal level of Spectral activation is automatically calculated based on user rating of the listening experience.

+ Package Option, + Manual Listening Profile and + Manual Spectral Activation are additional options for an experienced user.

I-day Entry Training OBJECTIVES

This training course is focused on practical knowledge.

Learn how sounds are processed and discriminated by the auditory system and what can be done to improve auditory processing skills.

This training

- helps to understand the basics of neuro-anatomy of the auditory system and the science behind music and sounds
 - provides criteria when to recommend auditory training
 - teaches in which areas auditory training is helpful
 - explains what changes can be expected and why (neurological reasoning).
- Complimented by S.I.L.C. (see other side for details) this training is a qualification course of the Samonas I certificate. It focuses on the Samonas teamPower concept (the Samonas Team creates the listening plan for the practitioner) to allow an easy start with minimal need of Samonas System knowledge and practical experience.
- This training has been developed to allow an immediate implementation of Samonas Auditory Training with your client.

Based on practical examples the participant will be trained in

- providing relevant input parameters for the Samonas team to create an assessment based, goal oriented, personalized Samonas Listening Protocol
- guiding a client through his/her listening plan
- monitoring listening results
- tailoring (adjusting) the clients listening protocol

Complimented by personal listening experience this training also provides the qualification as advisor for Samonas Personal Listening Plans (Self-guided listening for personal development and/or to enhance professional skills)

SAMONAS I - DAY ENTRY - TRAINING FOR PROFESSIONALS

Knowledge Resource and Qualification Training

Complimented by S.I.L.C.

Knowledge Resource:

This training day provides initial information about

- the auditory system as an active system
- peripheral and central auditory processing
- what is auditory training and why is it beneficial?
- auditory training with music and sounds of nature
- issues and challenges related to auditory dysfunctions

The knowledge above is recommended for any professional in order to understand the significant impact of auditory dysfunctions. Successful understanding of this knowledge is required as part of the Samonas I qualification

Who should attend?

Therapists and practitioners who wish to

- gain further understanding of the auditory system
- learn about auditory challenges
- understand the effects of music on the human system
- learn about therapeutic implementation of music
- reasons for and benefits of auditory training
- need to develop criteria when to refer to auditory training

New Qualification Training:

- covers the modules Sy1 and Th1 (see table on other side)
- focuses on the Samonas teamPower listening plans where Samonas creates a personalized protocol for you
- allows an immediate implementation of Samonas
- is hands-on, providing all practical knowledge needed
- discusses input parameters required for a tailored protocol
- walks you through the different options available
- provides criteria for monitoring listening results and adjusting the program week by week

Who should attend?

Qualification Course for professionals who

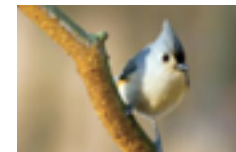

- need to determine when to use Samonas Auditory Training
- want to start using Samonas immediately after the training
- want the best possible results, delegating critical components to an experienced team, focusing on practical implementation
- are looking for the Samonas I SILC universal qualification
- wish to prepare for Samonas 2, 3 and 4 qualification
- want to upgrade from older versions of Samonas (i.e. SMART 2007)
